Nephrologist

The Division of Nephrology is seeking to recruit a full-time nephrologist with an academic focus in research (clinical, basic or translational).

Responsibilities

The successful candidate will be expected to participate in clinical care involving different facets of Nephrology (e.g., CKD, AKI, hemodialysis) in both the inpatient and outpatient settings. The individual will also have a general nephrology clinic at the Jindal Kidney Care Center. They will be expected to participate in the Nephrology evening dialysis and on-call rotation on a regular basis.

It is expected that they will actively participate in the teaching of fellows, residents and medical students. Clinical time commitment will depend on research and education career goals.

This position works under the general direction of the Head of the Division of Nephrology, Department of Medicine at the Ottawa Hospital/University of Ottawa.

Qualifications

The successful applicant must be licensed to practice medicine in Ontario; have, or be eligible for, certification in Nephrology by the Royal College of Physicians and Surgeons of Canada and be a member of or be eligible for membership with the Canadian Medical Protective Association.

Additional training and/or interest in developing expertise in home dialysis therapies is an asset.

Experience teaching medical students and residents is required.

Bilingualism (French and English) is an asset, although not a requirement.

Job Benefits

Employment Equity

The Ottawa Hospital renal program is one of the largest in Ontario. We currently provide care for approximately 900 dialysis patients (700 hemodialysis, 200 peritoneal dialysis and 30 home hemodialysis) and >1100 kidney transplant recipients. We have a dedicated inpatient nephrology ward, perform 80-100 kidney transplants annually, and are actively involved in the management of AKI/nephrology patients across the ICUs at our institution. In addition to clinics for general nephrology, we provide a multi-care kidney clinic (MCK) for patients with progressive renal disease and have specialized clinics for hypertension, glomerulonephritis, obstetrical nephrology, and cystic renal diseases.

We have a strong Royal College nephrology residency program (recently accredited until 2024) as well as a specialized fellowship programs in hypertension, transplantation, glomerulonephritis, advanced chronic kidney disease, home dialysis, advanced hemodialysis and critical care nephrology. We typically have 8-10 nephrology subspecialty residents and fellows each year.

Research is conducted through the Kidney Research Centre (KRC) of the Ottawa Hospital Research Institute. Basic science studies focus on diabetic nephropathy, acute kidney injury, and the biology of extracellular vesicles. Clinical research is led

Employment Type

Application Process

Queries can be directed to Dr. Jolanta Karpinski at jkarpinski@toh.ca

Applications: Please forward a 1-2 page letter outlining your interest in the position, clinical training in Nephrology, and academic plan, 3 references (who will not be contacted without permission), and a CV to Dr. Karpinski, Head, Division of Nephrology, The Ottawa Hospital and University of Ottawa at jkarpinski@toh.ca

The Department of Medicine is committed to ensuring equity, diversity and inclusion in our work environment. We strongly encourage applications from Indigenous persons, visible minorities members (racialized persons), persons with disabilities, women, as well as from all qualified candidates with the skills and knowledge to productively engage with equitable, diverse and inclusive communities. Candidates who wish to be considered as a member of one or more designated groups are asked to complete the confidential Self-Identification Questionnaire (Inclusion Form (uottawa.ca)). The data collected will remain confidential and only be used for EDI statistical analysis.

We encourage qualified applicants from all groups with historical and/or current barriers to equity to apply.
by several division members, working collaboratively on clinical trials, population-level studies and systematic reviews in AKI, CKD, dialysis, transplantation, PKD, GN, and blood pressure measurement/management. The KRC provides dedicated administrative staff and research coordinators, methodological assistance, and access to local, provincial and national administrative databases.

Upon request, accommodations due to a disability are available throughout the selection process.

Please note Canadian citizens and permanent residents will be given priority. We sincerely thank all applicants for their interest; however, only those selected for an interview will be contacted.
